PROFESSIONAL SUMMARY

Backend Software Developer with experience building secure, scalable backend systems for production environments. Proficient in **Python, Flask, Node.js**, and **MongoDB**, with strong expertise in **REST APIs**, authentication, and cloud deployments on AWS. Proven ability to design optimized data models, integrate third-party services, and deliver high-performance backend solutions.

EXPERIENCE

XX Company	Bangalore
Software Developer I (Backend)	Feb 2024 - Present
- Built and scaled backend services for a smart home automation platform, supporting 4+ functional modules and enabling secure device-to-server communication for thousands of IoT interactions daily. - Strengthened platform security by implementing end-to-end encrypted authentication flows, reducing unauthorized access risks and ensuring 100% secure certificate-based communication between devices and servers. - Optimized data models and API performance, improving response times by ~30% and ensuring reliable integration with multiple external services across automation, analytics, and management workflows.	

EDUCATION

XX College	place
Master of Computer Application (MCA)	2020 - 2022
YY College	place
Bachelor of Computer Application (BCA)	2015 - 2018
