SKILLS

SQL, Informatic PowerCenter, IICS, MYSQL, Teradata SQL server, Database Management, UNIX Scripting, Putty, DBeaver, Power BI

EXPERIENCE

ETL Developer, TCS, Bangalore

Jan 2020 - May 2023

ETL Developer

- Experienced Data Engineer with 2.5+ years of hands-on expertise in designing, developing and ETL processes
- Extracted and loaded data from various sources, ensuring data quality and accuracy using Informatica Powercenter 10.4/10.5
- Achieved 100% data quality using blend of SQL, Informatica Powercenter and UNIX scripting
- Engaged daily standup sessions, information sharing among team members, resulting in heightened collaboration and alignment with sprint goals. This practice contributed to a 20% increase in task clarity and a 15% enhancement in overall sprint efficiency.

PROJECTS

Enterprise Data Services (EDS) - Risk and Compliance Team

- Generated over 20 files according to well-defined business logic, ensuring that each file is created with adherence to the specific requirements and rules established by the organization.
- Leveraged the Extract framework in conjunction with SQL queries to systematically produce data files which will meet 100% business requirements
- Implemented Technologies: SQL, Teradata SQL server, UNIX Scripts, Putty (0.76)

Enterprise Data Warehouse (EWD) - Merchant Reporting

- Created data quality reports based on the precise business logics. These reports serve as valuable assets for informed decision-making and maintaining 100% data integrity, aligning seamlessly with the business's specific requirements
- Leveraged the Informatica PowerCenter(10.4/10.5) ETL (Extract, Transform, Load) tool to proficiently extract, transform, and load data into Teradata tables.
- Developed SQL queries that adhere to the business logic, crafted to ensure 100% data quality and accuracy.
- Achieved Technologies: SQL, Teradata SQL server, Informatica Powercenter(10.4/10.5), UNIX Scripts

New Distribution Center Data Load

- Prepared and established an end to end architecture for data loading process for 2 new distribution centers
- Designed Control -M jobs to schedule and automated the data ingestion process with 100% efficiency
- Implemented an Informatica workflow to streamline the ETL process which will load data from all 3 source files to Dbeaver Redshift tables
- Optimized data loading procedures to enhance efficiency and reduce processing times ,resulting in a 50% reduction in deployment time
- Tested the data loading process to validate the 100% accuracy and completeness of the transferred data
- Maintained comprehensive documentation of the entire development process of 2 distribution centers including job schedules, scripts and workflow parameters
- Achieved technologies: Control -M, SQL, Unix script, Informatica, Putty , AWS S3, EC2

AWARDS

- Star of the month (Internal TCS Award) – Project 2
Words on Certificate: Karthik Manjunath is a hard working resource and never say no attitude helps the team to deliver in time.
- TCS Gems (Internal TCS Award) – Project 2
Words on Certificate: Karthik Manjunath is a dedicated team member, gained good knowledge in EDH track deliverables in a short span of time. Taking care of all the assigned tasks with responsibility.

EDUCATION

JSS College of Arts, Commerce and Science, Ooty Road, Mysore
Bachelor of Computer Applications

2015-2018
